# Control: When Managers Monitor Performance

## \* Controlling

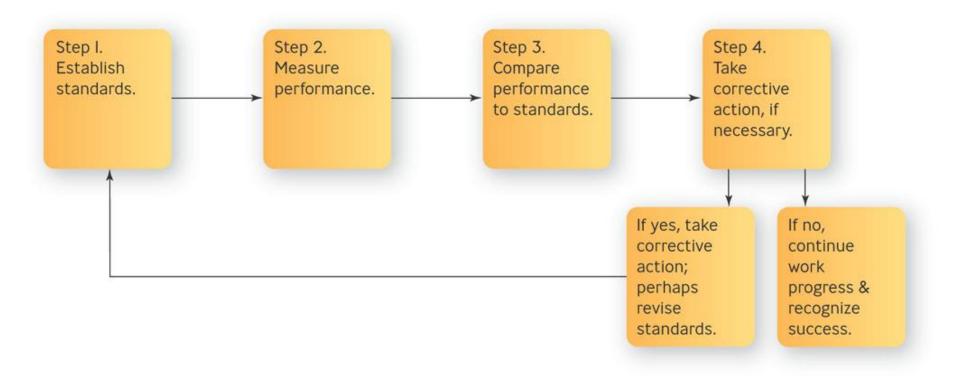

defined as monitoring performance, comparing it with goals, and taking corrective action as needed

# Why Is Control Needed?

- 1. To adapt to change & uncertainty
- 2. To discover irregularities & errors
- 3. To reduce costs, increase productivity, or add value
- 4. To detect opportunities
- 5. To deal with complexity
- 6. To decentralize decision making & facilitate teamwork

#### Figure 16.3

#### 1. Establish standards

- performance standard is the desired performance level for a given goal
- best measured when they can be made quantifiable

### 2. Measure performance

usually obtained from written reports, oral reports, and personal observations

#### 3. Compare performance to standards

← Management by exception – control principle that says managers should be informed of a situation only if data show a significant deviation from standards

### 4. Take corrective action if necessary

- ← Make no changes
- Recognize and reinforce positive performance
- ← Take action to correct negative performance

### Question

- A UPS driver fails to perform according to the standards set for the route and traffic conditions. A supervisor rides along and gives suggestions for improvement. This is the \_\_\_\_\_\_ stage of the control process.
- A. Compare performance to standards
- B. Establish standards
- C. Take corrective action
- D. Measure performance

### **Levels of Control**

## \* Strategic control

monitoring performance to ensure that strategic plans are being implemented and taking corrective action as needed

#### \* Tactical control

monitoring performance to ensure that tactical plans - those at the divisional or departmental level - are being implemented

### **Levels of Control**

### \* Operational control

monitoring performance to ensure that operational plans - day-to-day goals - are being implemented and taking corrective action as

needed

### Six Areas of Control

Human **Informational Physical** resources Cultural **Financial** Structural

## Question

- A drug test employed by an organization in its hiring process is an example of a(n) \_\_\_\_\_ resource control.
- A. Physical
- B. Human
- C. Financial
- D. Informational

#### Structural Area

#### **\*** Bureaucratic control

an approach to
 organizational control
 that is characterized
 by use of rules,
 regulations, and
 formal authority to
 guide performance

#### Decentralized control

an approach to
 organizational control
 that is characterized
 by informal and
 organic structural
 arrangements

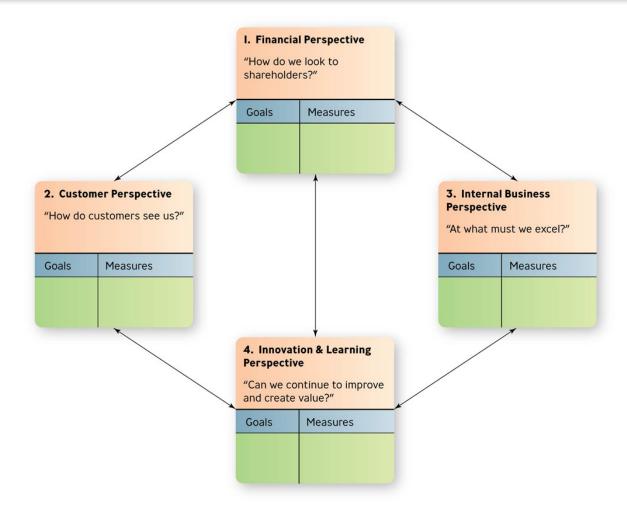

### The Balanced Scoreboard

- Sives top managers a fast but comprehensive view of the organization via four indicators:
  - (1) customer satisfaction, (2) internal processes,
  - (3) innovation and improvement activities and,
  - (4) financial measures

# The Balanced Scorecard: Four Perspectives

Figure 16.5

# The Balanced Scorecard: Four Perspectives

#### \* Financial

profitability, growth, shareholder values

#### \* Customer

priority is taking care of the customer

#### \* Internal business

quality, employee skills, and productivity

## \* Innovation & learning

learning and growth of employees

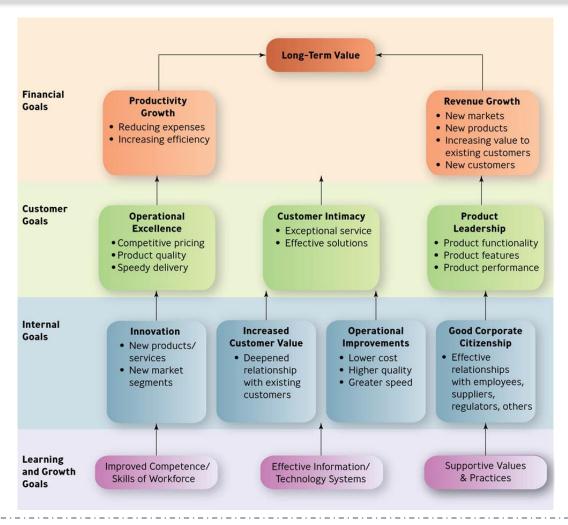

# The Visual Representation of a Balanced Scorecard

## \* Strategy map

 ✓ visual representation of the four perspectives of the balanced scorecard that enables managers to communicate their goals so that everyone in the company can understand how their jobs are linked to the overall objectives of the organization

# The Strategy Map

#### Figure 16.6

# Why Measure-Managed Firms Succeed

- \* Top executives agree on strategy
- \* Communication is clear
- \* There is better focus and alignment
- \* The organizational culture emphasizes teamwork and allows risk taking

### Barriers to Effective Measurement

- \* Objectives are fuzzy
- Managers put too much trust in informal feedback systems
- \* Employees resist new measurement systems
- \* Companies focus too much on measuring activities instead of results

### Question

- Jeff's sales goal was to "improve sales". Which barrier to measurement is this?
- A. Objectives are fuzzy
- B. Managers put too much trust in informal feedback systems
- C. Employees resist new measurement systems
- D. Companies focus too much on measuring activities

# Budgets: Formal Financial Projections

## **\*** Budget

formal financial projection

## \* Incremental budgeting

- allocates increased or decreased funds to a department by using the last budget period as a reference point
- only incremental changes in the budget request are reviewed

# Types of Budgets

#### **Table 16.1**

TYPE OF BUDGET	DESCRIPTION
Cash or cashflow budget	Forecasts all sources of cash income and cash expenditures for daily, weekly, or monthly period
Capital expenditures budget	Anticipates investments in major assets such as land, buildings, and major equipment
Sales or revenue budget	Projects future sales, often by month, sales area, or product
Expense budget	Projects expenses (costs) for given activity for given period
Financial budget	Projects organization's source of cash and how it plans to spend it in the forthcoming period
Operating budget	Projects what an organization will create in goods or services, what financial resources are needed, and what income is expected
Nonmonetary budget	Deals with units other than dollars, such as hours of labor or office square footage

# Fixed versus Variable Budgets

#### **☀** Fixed budgets

allocates resources
 on the basis of a
 single estimate of
 costs

#### Variable budgets

 allows the allocation of resources to vary in proportion with various levels of activity

#### **Financial Statements**

#### **\*** Balanced sheet

summarizes an organization's overall financial worth – assets and liabilities - at a specific point in time

#### **\* Income statement**

summarizes an organization's financial results – revenues and expenses - over specified period of time

# Ratio Analysis

#### Liquidity ratios

indicate how easily a firm's assets can be converted to cash

#### Debt management ratios

degree to which a firm can meet it's long-term financial obligations

#### \* Return ratios

how effective management is generating a return or profit

#### **Audits**

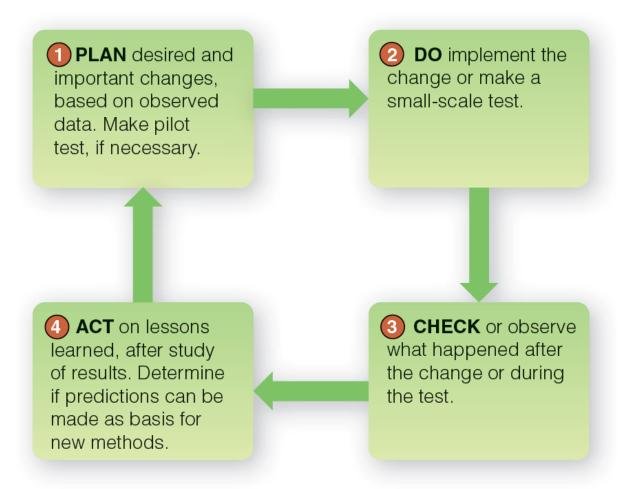

- formal verification of an organization's financial and operational systems
- \* External performed by outside experts
- Internal performed by organization's own professional staff

# Deming Management

- 1. Quality should be aimed at the needs of the consumer
- 2. Companies should aim at improving the system, not blaming workers
- Improved quality leads to increased market share, increased company prospects, & increased employment
- 4. Quality can be improved on the basis of hard data, using the PDCA cycle

# The PDCA Cycle

#### Figure 16.7

# **Total Quality Management**

## \* Total Quality Management (TQM)

a comprehensive approach - led by top management and supported throughout the organization - dedicated to continuous quality

improvement, training, and customer satisfaction

# Two Core Principles of TQM

### 1. People orientation

everyone involved in the organization should focus on delivering value to customers

### 2. Improvement orientation

everyone should work on continuously improving work processes

# **People Orientation**

- \* Delivering customer value is most important
- People will focus on quality if given empowerment
- \* TQM requires training, teamwork, and crossfunctional efforts

# Improvement Orientation

- \* It's less expensive to do it right the first time
- \* It's better to do small improvements all the time
- \* Accurate standards must be followed to eliminate small variations
- \* There must be strong commitment from top management

# Applying TQM to Services

#### \* RATER scale

enables customers to rate the quality of a service along dimensions – reliability, assurance, tangibles, empathy, and responsiveness

# Some TQM Techniques

Outsourcing

Reduced cycle time

ISO 9000 and 14000 Series

Statistical process control

Six Sigma & Lean Six Sigma

## Question

In Harvey's job, he takes random samples of production runs to ascertain quality. His job involves:

- A. Benchmarking
- B. Statistical process control
- C. Reduced cycle time
- D. Feedforward control

# The Keys to Successful Control Systems

- 1. They are strategic & results oriented
- 2. They are timely, accurate, & objective
- 3. They are realistic, positive, & understandable & encourage self-control
- 4. They are flexible

#### **Barriers to Control Success**

- 1. Too much control
- 2. Too little employee participation
- 3. Overemphasis on means instead of ends
- 4. Overemphasis on paperwork
- 5. Overemphasis on one instead of multiple approaches

# Managing for Productivity

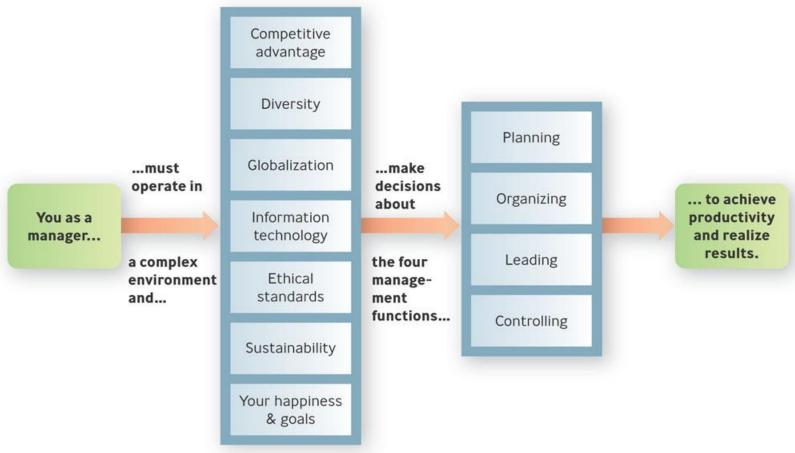

## Productivity

Outputs divided by inputs where: outputs are the goods and services produced, and inputs are labor, capital, materials, and energy

Productivity = 
$$\frac{\text{Outputs}}{\text{Inputs}}$$
 or  $\frac{\text{Goods + Services}}{\text{Labor + Capital + Materials + Energy}}$
